SUMMARY

AI and data engineer at Kapita Research, building the pipelines that take raw Iraqi data, much of it in Arabic, from collection to clean datasets, dashboards and research findings. I work on web scraping, data quality and validation, LLM-based classification and machine learning, mostly on local-market problems. Graduated first in my class in Information and Communication Engineering from Al-Nahrain University.

TECHNICAL SKILLS

PROGRAMMING & DATA	DATA ENGINEERING	AI & MACHINE LEARNING	ANALYSIS & VIZ
- Python - SQL (PostgreSQL, MySQL) - DuckDB, SQLite - MongoDB, Cassandra	- Scraping: Scrapy, Playwright - Pandas, Polars, PyArrow - ETL (Airflow, Kafka) - Data quality & validation	- LLM pipelines - LangGraph - Claude & OpenAI APIs - Scikit-learn, TensorFlow	- Exploratory data analysis - GIS & spatial analysis - Interactive dashboards - Tableau

PROFESSIONAL EXPERIENCE

AI & Data Engineer, Kapita Research	Full-time Jul 2026 - present
- Design and build data pipelines that collect data from web, document and messaging sources, then clean, validate and structure it for analysis. - Build LLM-based systems that screen, classify and summarise large volumes of Arabic and English text, with human review before anything is published. - Turn cleaned data into interactive dashboards and support the firm's market research with analysis and quality review. - Build internal tools and automation that make the team's data and research work faster and easier to check.	
Event Operations & Data Coordinator, TicketZone / Digital Zone	Part-time Oct 2024 - Jul 2026
Managed QR-based check-in operations and attendee data flows for large public events.	
Network & Data Systems Trainee, Asiacell Communications	Summer Training 2025
Hands-on exposure to telecom infrastructure, network operations and data systems.	
Robotics Trainer & Events Assistant, JuniorSpace	May 2023 - Apr 2024
Taught robotics to children aged 6 to 12; supported events including "Yafia' fi al-malaab" with LALIGA.	

PROJECTS

Iraqi Job Market Analysis Pipeline
101,961 job posts from 30+ Telegram channels and 10+ platforms, classified by a multi-stage AI pipeline, for an Arabic report on Iraq's private-sector job market.
Iraq Service Atlas
135,000+ service points in 16 categories analysed on 10 km and 1 km grids, with an Arabic dashboard and report.
Multi-Agent LLM Control for 5G/6G Networks (graduation project)
Deterministic agents plus a safety-guarded LLM strategist (LangGraph): 73% fewer URLLC drops in simulation.
Also: Arabic maqam classification from audio (CNN-LSTM, 92.7% accuracy) and more ML/DL work on Kaggle .

EDUCATION

Al-Nahrain University	Oct 2022 - Jun 2026
College of Information Engineering B.Sc. Information and Communication Engineering Ranked 1st in class	

CERTIFICATIONS

Claude Certified Architect, Foundations	IBM Data Science Professional Certificate
Anthropic, Sep 2026	Python, SQL, machine learning and visualization, 12 courses
IBM Data Analyst Professional Certificate	IBM Machine Learning Professional Certificate
Data analysis, Excel, SQL and Cognos Analytics, 11 courses	ML, deep learning, time series and RL, 6 courses
IBM Data Engineering Professional Certificate	Machine Learning Specialization, Stanford Online
Data pipelines, ETL, relational and NoSQL databases	Supervised, unsupervised and RL, 3 courses

VOLUNTEERING

AI Developer, National Iraqi Cyber Security Team (2024) | **Translator**, Tech for Peace (2024 - 2026) | **ICE study archive**, four years of course material for my cohort
